

Year 1

Addition

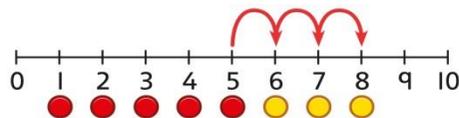

Adding one-digit and two-digit numbers to 20 including 0

Write mathematical statements 'number sentences' involving (+) and (=)

E.g. $3 + 4 = 7$

Children to write number sentences in the correct order, with one digit in each box.

Use a number line alongside counters, remove counters once children use this scaffold effectively.

$$5 + 3 = 8$$

Scaffolding

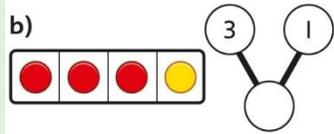

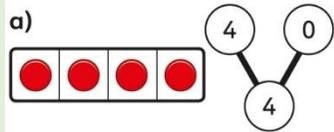

Children to use cubes, counters and part, part whole models

E.g. Two different colours of cubes/counters for each number that is being added and count the total

$$3 + 4 = 7$$

E.g. Use counters on a part, part, whole model prior to writing the numerals and constructing the number sentence

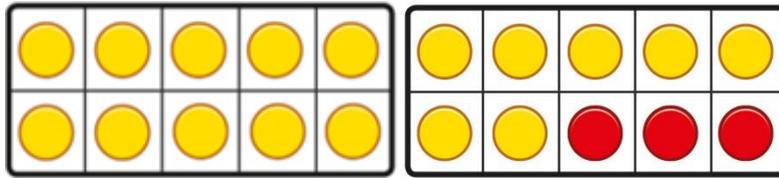

$$4 + 0 = 4$$

$$3 + 1 = 4$$

Number bonds

Use tens frames to check answers when representing a number bond to 10, and to then answer derived facts to 20.

$17 + \underline{\quad} = 20$
*I know that $7 + 3 = 10$ and 17 is $(10 + 7)$
 Therefore $17 + 3 = 20$*

Subtraction

Subtract one-digit and two-digit numbers within 20

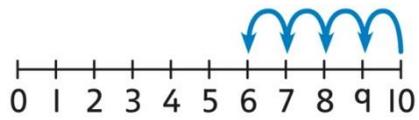

Write mathematical statements 'number sentences' involving (-) and (=)

E.g. $9 = 5 + 4$

Children to write number sentences in the correct order, with one digit in each box.

Count backwards using a number line.

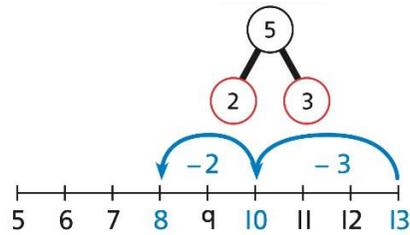

E.g.

$$10 - 4 = 6$$

The difference between 10 and 6 is 4

Moving onto -

Scaffolding

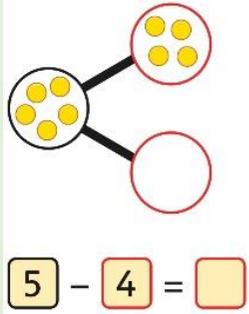

Children to draw and cross out objects or use counters and remove the amount being subtracted.

$9 - \square = \square$

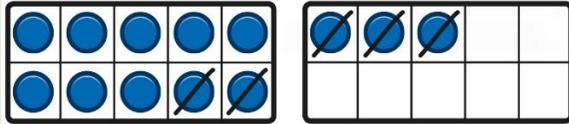

E.g. There are children left.

Children to use part, part, whole model to find the missing part.

E.g.

$$13 - 5 =$$

For $13 - 5$, I take away 3 to make 10, then take away 2 to make 8.

Multiplication

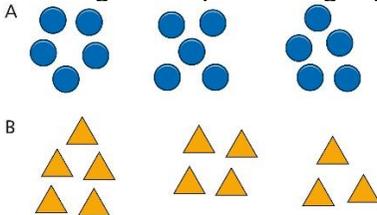

Solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher

In order to identify equal groups within a number. Children can use the following scaffolds:

Arranging objects:

Drawing and representing equal and unequal groups:

Counting in 2's, 5's or 10's

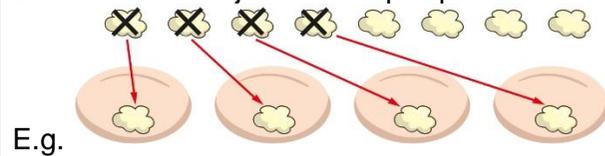

There are 5 pens in each pack ...
5...10...15...20...25...30...35...40

Division

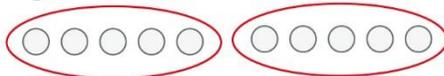

Solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher

Share a set of objects into equal parts and work out how many are in each part.

Represent a whole and work out how many equal groups.

E.g.

*There are 10 in total.
There are 5 in each group.
There are 2 groups.*

Column addition when adding a one-digit number to a two-digit number (without regrouping)

$$34 + 5 = 39$$

T	O
3	4
+	5
	9

Scaffolding

Use base ten equipment, dienes, drawn representations of tens and ones (e.g. sticks and dots)

Add the 1s.

*34 is 3 tens and 4 ones.
4 ones and 5 ones are 9 ones.
The total is 3 tens and 9 ones.*

T	O

Column addition when adding a one-digit number to a two-digit number (with regrouping)

$$\begin{array}{r} \text{T} \quad \text{O} \\ 2 \quad 4 \\ + \quad 8 \\ \hline \quad 2 \\ \hline \end{array}$$

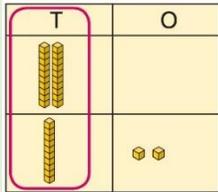

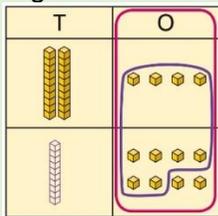

$$\begin{array}{r} \text{T} \quad \text{O} \\ 2 \quad 4 \\ \quad 8 \\ \hline 3 \quad 2 \\ \hline \end{array}$$

Children to understand that they are exchanging '10 ones' for '1 ten'

Scaffolding

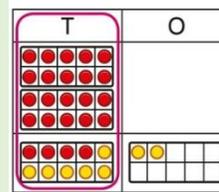

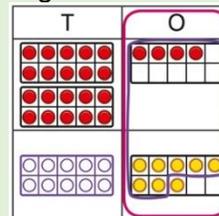

Use base ten/dienes equipment

E.g.

Use tens frames

E.g.

Adding a multiple of 10 to a two-digit number

Add the 10s represented vertically. Children must understand how the method relates to unitising of 10s and place value.

$$\begin{array}{r} \text{T} \quad \text{O} \\ 1 \quad 6 \\ + 3 \quad 0 \\ \hline 4 \quad 6 \\ \hline \end{array}$$

$$1 + 3 = 4$$

$$1 \text{ ten} + 3 \text{ tens} = 4 \text{ tens}$$

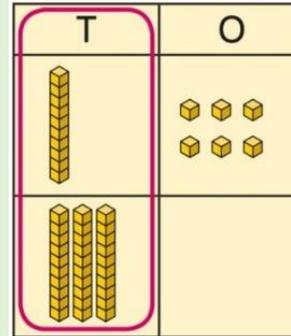

$$16 + 30 = 46$$

Scaffolding

A 100 square can support this understanding.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

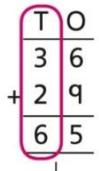

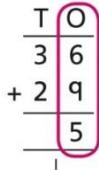

Add the 10s using a place value grid to support.

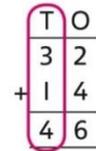

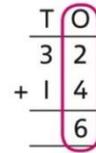

16 is 1 ten and 6 ones.
30 is 3 tens.
There are 4 tens and 6 ones in total.

Adding two two-digit numbers (with and without regrouping)

Add the 1s. Exchange 10 ones for a ten. Then add the 10s.

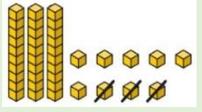

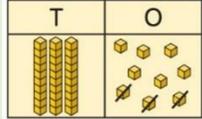

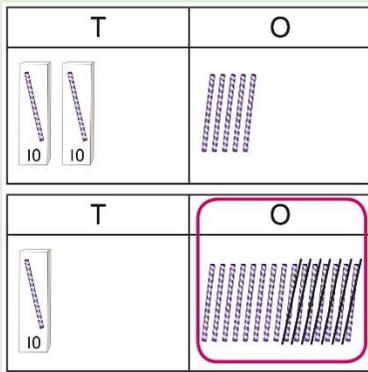

Add the 1s. Then add the 10s.

Scaffolding

As above – place value grids, base ten/diene equipment

<p>Column subtraction of a one-digit number from a two-digit number (without renaming)</p>	$\begin{array}{r} \text{T} \quad \text{O} \\ 39 \\ - \quad 3 \\ \hline 36 \end{array}$ <p>$9 - 3 = 6$ $39 - 3 = 36$</p>
<p>Scaffolding</p>	<p>Subtract the 1s. This may be done in or out of a place value grid.</p>  
<p>Column subtraction of a one-digit number from a two-digit number (with regrouping)</p>	<p>Exchange 1 ten for 10 ones.</p> $\begin{array}{r} \text{T} \quad \text{O} \\ 25 \\ - \quad 7 \\ \hline 18 \end{array}$ $\begin{array}{r} \text{T} \quad \text{O} \\ 25 \\ - \quad 7 \\ \hline 18 \end{array}$ <p>$25 - 7 = 18$</p>
<p>Scaffolding</p>	<p>Exchange 1 ten for 10 ones. This may be done in or out of a place value grid.</p>

Subtracting a two-digit number from a two-digit number (without regrouping)

Using column subtraction, subtract the 1s. Then subtract the 10s.

T	O
4	5
- 1	2
<hr/>	
	3

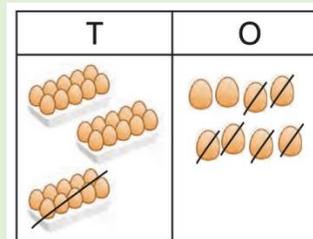

T	O
4	5
- 1	2
<hr/>	
3	3

Scaffolding

Subtract the 10s and the 1s.
This can be represented on a 100 square.
 $68 - 26 = 42$

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

Subtract the 1s. Then subtract the 10s. This may be done in or out of a place value grid.
 $38 - 16 = 22$

$38 - 16 = 22$

Subtracting a two-digit

Using column subtraction, exchange 1 ten for 10 ones. Then subtract the 1s. Then subtract the 10s.

number from a two-digit number (with regrouping)

$$\begin{array}{r} \text{T O} \\ 45 \\ - 27 \\ \hline \end{array}$$

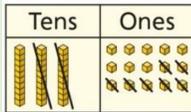

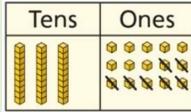

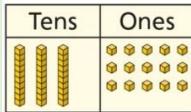

$$\begin{array}{r} \text{T O} \\ \cancel{3}^4 15 \\ - 27 \\ \hline \end{array}$$

$$\begin{array}{r} \text{T O} \\ \cancel{3}^4 15 \\ - 27 \\ \hline 8 \end{array}$$

$$\begin{array}{r} \text{T O} \\ \cancel{3}^4 15 \\ - 27 \\ \hline 18 \end{array}$$

Scaffolding

Exchange 1 ten for 10 ones. Then subtract the 1s. Then subtract the 10s.

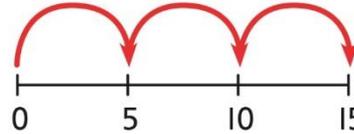

Multiplication

Recall and use multiplication facts for the 2, 5 and 10 multiplication tables

Write multiplication statements (a number sentence) correctly using (x) and (=) symbols.

*E.g. $2 \times 5 = 10$
 $9 \times 10 = 90$
 $6 = 3 \times 2$*

Children can represent these statements using arrays and on a number line and begin by expressing multiplication as repeated addition.

$5 + 5 + 5 = 15$
*3 equal groups of 5 is written as $3 \times 5 = 15$
"3 lots of 5" "3 groups of 5"*

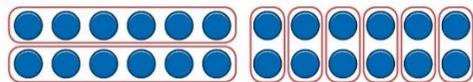

Commutativity

Use arrays to visualise commutativity – real life objects are a good way of demonstrating this.

*I can see 6 groups of 3.
I can see 3 groups of 6.*

Form arrays using counters to visualise commutativity. Rotate the array to show that orientation does not change the multiplication.

This is 2 groups of 6 and also 6 groups of 2.

Using knowledge of commutativity will help children to check their answers.

"If 4 groups of 2 is 8, let me check if 2 lots of 4 is 8"

Division

Recall and use multiplication facts for the 2, 5 and 10 multiplication tables

Write a division statement correctly using (\div) and ($=$) symbols.

Sharing equally

Represent the objects shared into equal parts using a bar model.

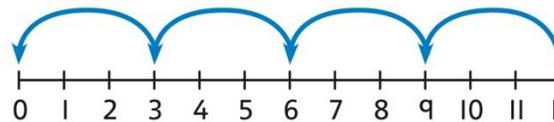

*20 shared into 5 equal parts.
There are 4 in each part.*

Use a bar model to support understanding of the division.

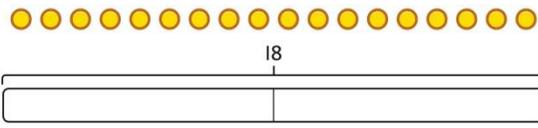

Write a division statement correctly using (\div) and ($=$) symbols.

Grouping equally

Understand how to relate division by grouping to repeated subtraction.

There are 4 groups now.

	 <p>$18 \div 2 = 9$</p>	<p>12 divided into groups of 3. $12 \div 3 = 4$</p> <p>There are 4 groups.</p>
--	---	--

Scaffolding

Start with a whole and share into equal parts, one at a time.

12 shared equally between 2.
 They get 6 each.

Start to understand how this also relates to grouping. To share equally between 3 people, take a group of 3 and give 1 to each person. Keep going until all the objects have been shared.

Understand how to make equal groups from a whole.

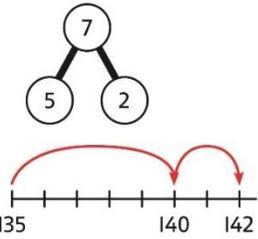

8 divided into 4 equal groups.
 There are 2 in each group.

Year 3

Addition

Adding a three-digit number and a one-digit number (with regrouping)

Understand how to rename by partitioning to the 1s to make the next 10.

$135 + 7 = ?$
 $135 + 5 + 2 = 142$

Ensure that children understand how to add 1s renaming a 100.

Children to use column method and exchange 10 ones for 1 ten.

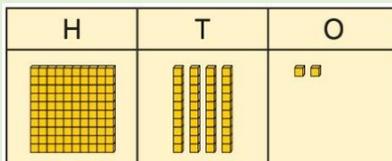

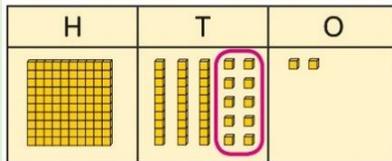

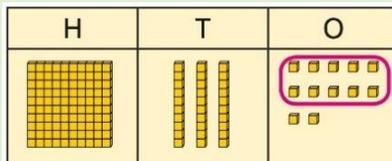

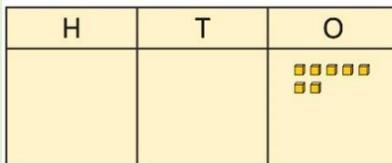

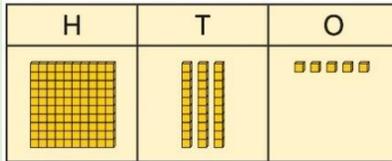

$$\begin{array}{r}
 467 \\
 + \quad 4 \\
 \hline
 471 \\
 1
 \end{array}$$

$198 + 5 = ?$

$198 + 2 + 3 = 203$

Scaffolding

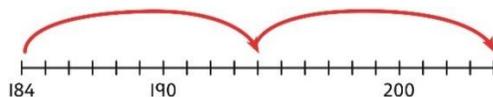

Exchange 10 ones for 1 ten where needed. Use a place value grid to support the understanding.

$135 + 7 = 142$

Add a three-digit number with a multiple of ten (with renaming)

Understand how the addition relates to counting on in 10s across 100.

Column addition with the renaming of the hundreds column, in exchange for 10 tens:

$184 + 20 = ?$

I can count in 10s ... 194 ... 204

$184 + 20 = 204$

Use number bonds within 20 to support efficient mental calculations.

$385 + 50$

There are 8 tens and 5 tens.

That is 13 tens.

$385 + 50 = 300 + 130 + 5$

$385 + 50 = 435$

$$\begin{array}{r} 4 \ 5 \ 6 \\ + \quad 7 \ 0 \\ \hline 5 \ 2 \ 6 \\ | \end{array}$$

Add a three-digit number and a two-digit number

Without renaming:

Use the vertical column method to represent the addition. Children must understand how this relates to place value at each stage of the calculation.

With renaming:

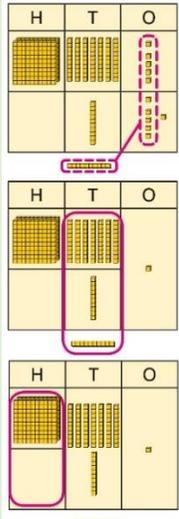

Use a column method with exchange. Children must understand how the method relates to place value at each stage of the calculation.

$$\begin{array}{r} \text{H T O} \\ 2 \ 7 \ 5 \\ + \quad 1 \ 6 \\ \hline \quad 1 \end{array}$$

$$\begin{array}{r} \text{H T O} \\ 2 \ 7 \ 5 \\ + \quad 1 \ 6 \\ \hline 9 \ 1 \\ \hline \end{array}$$

$$\begin{array}{r} \text{H T O} \\ 2 \ 7 \ 5 \\ + \quad 1 \ 6 \\ \hline 2 \ 9 \ 1 \\ | \end{array}$$

$275 + 16 = 291$

<p>Scaffolding</p>	 <p>Use place value equipment to make and combine groups to model addition.</p> <p>Use a place value grid to organise thinking and adding of 1s, then 10s.</p>	<p>Represent the required exchange on a place value grid using equipment.</p> <p>$275 + 16 = ?$</p>  <p>$275 + 16 = 291$</p> <p>Note: In this example, a mental method may be more efficient. The numbers for the example calculation have been chosen to allow children to visualise the concept and see how the method relates to place value.</p>
<p>Three-digit number add a three-digit number</p>	<p>Without renaming:</p> <p>Use a column method to solve efficiently, using known bonds. Children must understand how this relates to place value at every stage of the calculation.</p>	<p>With renaming:</p> <p>Use column addition, ensuring understanding of place value at every stage of the calculation.</p>

$$\begin{array}{r}
 \text{H T O} \\
 126 \\
 + 217 \\
 \hline
 343
 \end{array}$$

$$\begin{array}{r}
 \text{H T O} \\
 126 \\
 + 217 \\
 \hline
 43
 \end{array}$$

$$\begin{array}{r}
 \text{H T O} \\
 126 \\
 + 217 \\
 \hline
 343
 \end{array}$$

$$126 + 217 = 343$$

Note: Children should also study examples where exchange is required in more than one column, for example $185 + 318 = ?$

Scaffolding

Represent the place value grid with equipment to model the stages of column addition.

Use place value equipment to make a representation of a calculation. This may or may not be structured in a place value grid.

$326 + 541$ is represented as:

H	T	O

3	2	6
5	4	1

Model the stages of column addition using place value equipment on a place value grid.

Subtraction

Three-digit number subtract up to a three-digit number (without renaming)

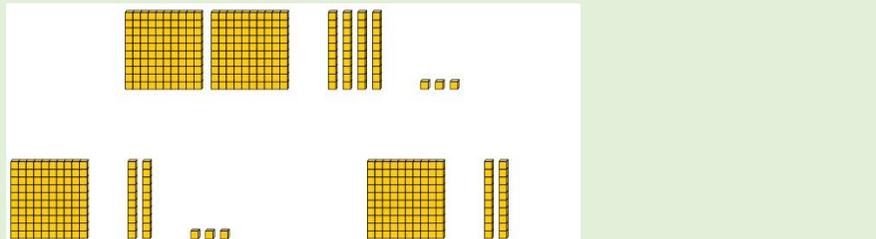

Use column subtraction to calculate accurately and efficiently.

$$\begin{array}{r} \text{H T O} \\ 999 \\ - 352 \\ \hline 7 \end{array}$$

$$\begin{array}{r} \text{H T O} \\ 999 \\ - 352 \\ \hline 47 \end{array}$$

$$\begin{array}{r} \text{H T O} \\ 999 \\ - 352 \\ \hline 647 \end{array}$$

Scaffolding

Use place value equipment to explore the effect of splitting a whole into two parts, and understand the link with taking away.

Represent the calculation on a place value grid.

H	T	O

Three-digit number subtract up to a three-digit number (with renaming)

Use column subtraction to work accurately and efficiently.

$$\begin{array}{r} \text{H T O} \\ 1 \overset{\ominus}{\cancel{0}} 5 \\ - 38 \\ \hline 137 \end{array}$$

$$175 - 38 = 137$$

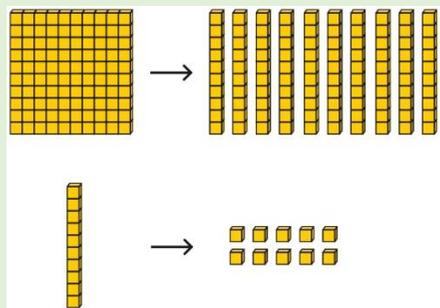

If the subtraction is a 3-digit number subtract a 2-digit number, children should understand how the recording relates to the place value, and so how to line up the digits correctly.

Children should also understand how to exchange in calculations where there is a zero in the 10s column.

$$\begin{array}{r} \text{H T O} \\ 506 \\ - 328 \\ \hline \end{array}$$

Scaffolding

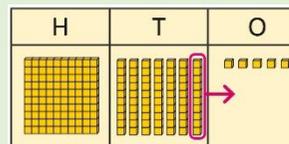

Use equipment to enact the exchange of 1 hundred for 10 tens, and 1 ten for 10 ones.

Model the required exchange on a place value grid.

$$175 - 38 = ?$$

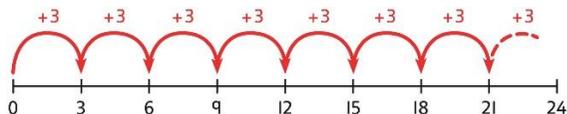

I need to subtract 8 ones, so I will exchange a ten for 10 ones.

Multiplication

Understanding equal grouping and repeated addition for unknown tables.

Children understand the link between repeated addition and multiplication.

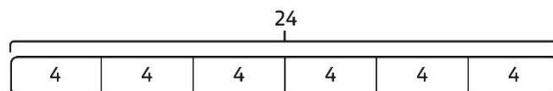

8 groups of 3 is 24.

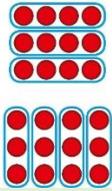

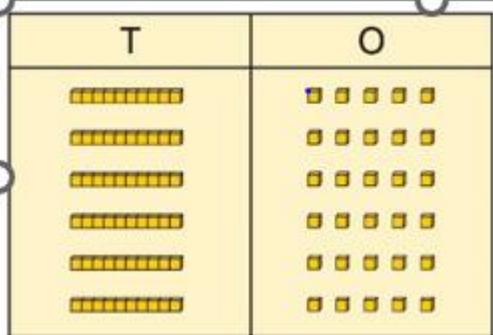

$$3 + 3 + 3 + 3 + 3 + 3 + 3 + 3 = 24$$

$$8 \times 3 = 24$$

A bar model may represent multiplications as equal groups.

$$6 \times 4 = 24$$

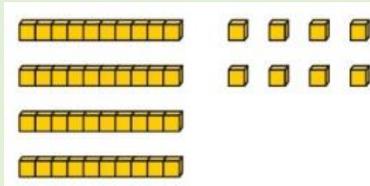

<p>Scaffolding</p>	<p>Children recognise that arrays demonstrate commutativity.</p>  <p><i>This is 3 groups of 4.</i> <i>This is 4 groups of 3.</i></p>	
<p>Multiplying a two-digit number by a one-digit number</p>	<p>Children may write calculations in expanded column form but must understand the link with place value and exchange.</p>  $ \begin{array}{r} \text{T} \quad \text{O} \\ \hline 1 \quad 5 \\ \times \quad 6 \\ \hline \end{array} $	
<p>Scaffolding</p>	<p>Use place value equipment to model how 10 ones are exchanged for a 10 in some multiplications.</p> <p>$3 \times 24 = ?$</p> <p>$3 \times 20 = 60$ $3 \times 4 = 12$</p>	<p>Understand that multiplications may require an exchange of 1s for 10s, and also 10s for 100s.</p> <p>$4 \times 23 = ?$</p>

Two-digit number divided by one-digit number, no remainders

$$\begin{array}{r} 26 \\ 3 \overline{) 78} \end{array}$$

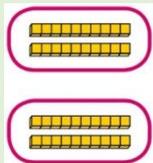

Scaffolding

Children explore dividing 2-digit numbers by using place value equipment.

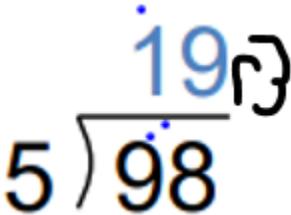

$$48 \div 2 = ?$$

First divide the 10s.

Then divide the 1s.

<p>Two-digit number divided by one-digit number, with remainders</p>	
<p>Scaffolding</p>	<p>Use place value equipment to understand the concept of remainder.</p> <p><i>Make 29 from place value equipment. Share it into 2 equal groups.</i></p>  <p><i>There are two groups of 14 and 1 remainder.</i></p>

<p>Year 4</p>	
<p>Addition</p>	
<p>Column addition with exchange</p>	<p>Use a column method to add, including exchanges.</p>

	Th	H	T	O

<hr/>				
	5	7	9	1

Include examples that exchange in more than one column.

Scaffolding

Use place value equipment to model required exchanges.

Include examples that exchange in more than one column.

Representing additions and checking strategies

Bar models may be used to represent additions in problem contexts, and to justify mental methods where appropriate.

1,373	
799	574

$$\begin{array}{r}
 \text{Th} \quad \text{H} \quad \text{T} \quad \text{O} \\
 \hline
 7 \quad 9 \quad 9 \\
 + \quad 5 \quad 7 \quad 4 \\
 \hline
 1 \quad 3 \quad 7 \quad 3 \\
 \hline
 \end{array}$$

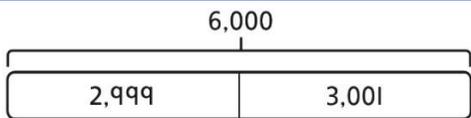

I chose to work out $574 + 800$, then subtract 1.

Use rounding and estimating on a number line to check the reasonableness of an addition.

$912 + 6,149 = ?$

I used rounding to work out that the answer should be approximately $1,000 + 6,000 = 7,000$.

This is equivalent to 3,000 + 3,000.

Subtraction

Column subtraction with exchange

Use column subtraction, with understanding of the place value of any exchange required.

	Th	H	T	O
	1	2	5	0
-		4	2	0
				0

	Th	H	T	O
	1	2	5	0
-		4	2	0
				3

	Th	H	T	O
	1	12	5	0
-		4	2	0
				8

	Th	H	T	O
	1	12	5	0
-		4	2	0
				8

Scaffolding

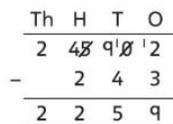

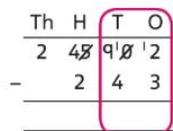

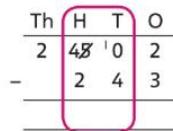

Represent place value equipment on a place value grid to subtract, including exchanges where needed.

Column subtraction with exchange across more than one column

Make exchanges across more than one column where there is a zero as a place holder.

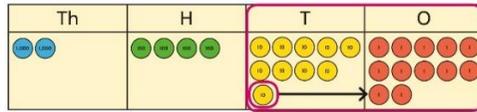

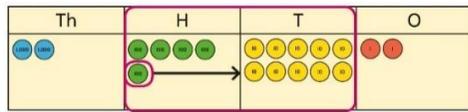

$$2,502 - 243 = ?$$

Scaffolding

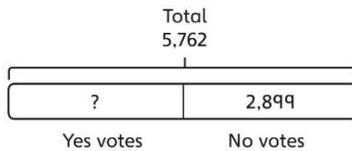

Make exchanges across more than one column where there is a zero as a place holder.

$$2,502 - 243 = ?$$

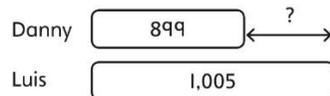

Representing subtractions and checking strategies

Use bar models to represent subtractions where a part needs to be calculated.

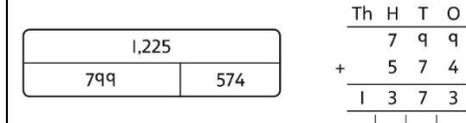

I can work out the total number of Yes votes using $5,762 - 2,899$.

Bar models can also represent 'find the difference' as a subtraction problem.

Use inverse operations to check subtractions.

*I calculated $1,225 - 799 = 574$.
I will check by adding the parts.*

*The parts do not add to make 1,225.
I must have made a mistake.*

Multiplication

Column multiplication for 2- and 3-digit numbers multiplied by a single digit

Use the formal column method for up to 3-digit numbers multiplied by a single digit.

$$\begin{array}{r} 312 \\ \times 3 \\ \hline 936 \end{array}$$

Understand how the expanded column method is related to the formal column method and understand how any exchanges are related to place value at each stage of the calculation.

$$\begin{array}{r} 23 \\ \times 5 \\ \hline 15 \\ 100 \\ \hline 115 \end{array}$$

$$\begin{array}{r} 23 \\ \times 5 \\ \hline 115 \\ \hline \end{array}$$

Scaffolding

Use place value equipment alongside a column method for multiplication of up to 3-digit numbers by a single digit.

3 | 2
 \times 3

 9 | 3 | 6

×	20	6	
5	100	30	= 130

Division

Dividing up to three digits by a single digit using short division

$186 \div 6 =$

0	3	1
1	8	6

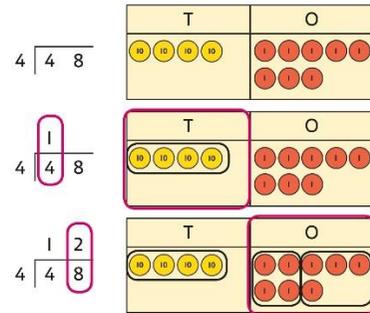

$1 \times 6 = 6$
 $3 \times 6 = 18$

no groups of 6 can be made

Scaffolding

Use place value equipment on a place value grid alongside short division.
The model uses grouping.

A sharing model can also be used, although the model would need adapting.

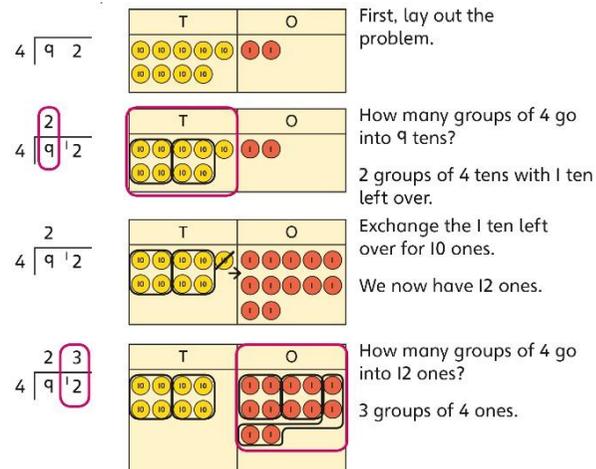

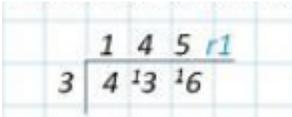

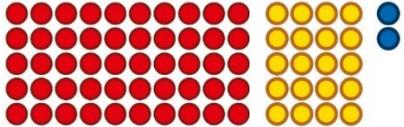

Lay out the problem as a short division.

There is 1 group of 4 in 4 tens.

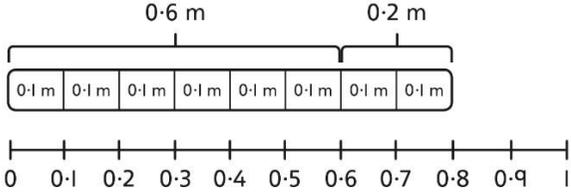

There are 2 groups of 4 in 8 ones.

Work with divisions that require exchange.

Understanding remainders.	
Scaffolding	<p>Represent the remainder as the part that cannot be shared equally.</p>  <p>$72 \div 5 = 14 \text{ remainder } 2$</p>

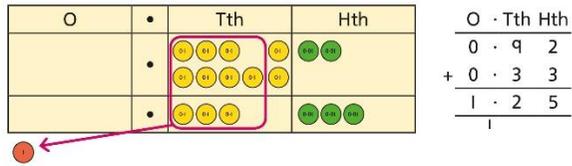

Year 5																
Addition																
Column addition with whole numbers	<p>Use column addition, including exchanges.</p> $ \begin{array}{r} \text{TTh Th H T O} \\ \hline 1 \ 9 \ 1 \ 7 \ 5 \\ + 1 \ 8 \ 4 \ 1 \ 7 \\ \hline 3 \ 7 \ 5 \ 9 \ 2 \\ \hline \end{array} $

<p>Adding tenths</p>	<p>Understand the link with adding fractions.</p> $\frac{6}{10} + \frac{2}{10} = \frac{8}{10}$ <p><i>6 tenths + 2 tenths = 8 tenths</i> <i>0.6 + 0.2 = 0.8</i></p>	
<p>Scaffolding</p>	<p>Link measure with addition of decimals.</p> <p><i>Two lengths of fencing are 0.6 m and 0.2 m.</i> <i>How long are they when added together?</i></p> 	<p>Use a bar model with a number line to add tenths.</p>  <p><i>0.6 + 0.2 = 0.8</i> <i>6 tenths + 2 tenths = 8 tenths</i></p>
<p>Adding decimals using column addition</p>	<p>Add using a column method, ensuring that children understand the link with place value.</p> $\begin{array}{r} \text{O} \cdot \text{Tth Hth} \\ 0 \cdot 2 \ 3 \\ + 0 \cdot 4 \ 5 \\ \hline 0 \cdot 6 \ 8 \end{array}$ <p>Include exchange where required, alongside an understanding of place value.</p> $\begin{array}{r} \text{O} \cdot \text{Tth Hth} \\ 0 \cdot 9 \ 2 \\ + 0 \cdot 3 \ 3 \\ \hline 1 \cdot 2 \ 5 \end{array}$ <p>Include additions where the numbers of decimal places are different.</p> <p><i>3.4 + 0.65 = ?</i></p> $\begin{array}{r} \text{O} \cdot \text{Tth Hth} \\ 3 \cdot 4 \ 0 \\ + 0 \cdot 6 \ 5 \\ \hline \end{array}$	

Scaffolding

Use place value equipment on a place value grid to represent additions.

Represent exchange where necessary.

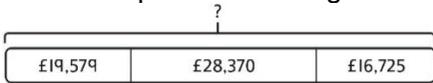

Include examples where the numbers of decimal places are different.

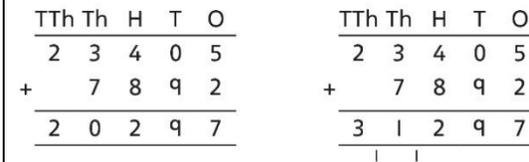

Checking strategies and representing additions

Bar models represent addition of two or more numbers in the context of problem solving.

Use approximation to check whether answers are reasonable.

I will use 23,000 + 8,000 to check.

Subtraction

Column subtraction with whole numbers

Use column subtraction methods with exchange where required.

	TTh	Th	H	T	O
	5	2	0	9	7
-	1	8	5	3	4
	4	3	5	6	3

$$62,097 - 18,534 = 43,563$$

Scaffolding

Use place value equipment to understand where exchanges are required.

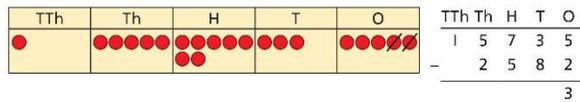

$$2,250 - 1,070$$

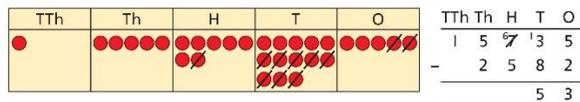

OR

Represent the stages of the calculation using place value equipment on a grid alongside the calculation, including exchanges where required.

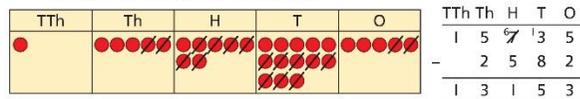

$$15,735 - 2,582 = 13,153$$

Now subtract the 10s. Exchange 1 hundred for 10 tens.

Subtract the 100s, 1,000s and 10,000s.

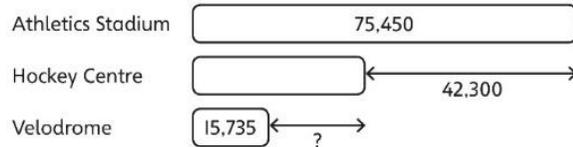

<p>Subtracting decimals</p>	<p>Explore complements to a whole number by working in the context of length.</p>  <p>1 m - <input type="text"/> m = <input type="text"/> m</p> <p>$1 - 0.49 = ?$</p>	<p>Use column subtraction, with an understanding of place value, including subtracting numbers with different numbers of decimal places.</p> <p>$3.921 - 3.75 = ?$</p> <table style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th></th> <th>O</th> <th>Tth</th> <th>Hth</th> <th>Thth</th> </tr> </thead> <tbody> <tr> <td></td> <td>3</td> <td>9</td> <td>2</td> <td>1</td> </tr> <tr> <td>-</td> <td>3</td> <td>7</td> <td>5</td> <td>0</td> </tr> <tr> <td colspan="5" style="text-align: center;">.</td> </tr> <tr> <td colspan="5" style="border-top: 1px solid black;"></td> </tr> </tbody> </table>		O	Tth	Hth	Thth		3	9	2	1	-	3	7	5	0	.

=	2	1	8	9																																					

Use approximation to check calculations.

I calculated 18,000 + 4,000 mentally to check my subtraction.

Use addition to check subtractions.

I calculated 7,546 - 2,355 = 5,191.

I will check using the inverse.

Multiplication

Multiplying by 10, 100 and 1,000

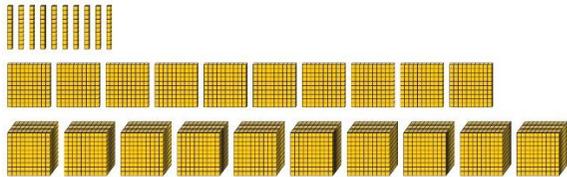

Understand how exchange relates to the digits when multiplying by 10, 100 and 1,000.

H	T	O
	1	7

$17 \times 10 = 170$
 $17 \times 100 = 17 \times 10 \times 10 = 1,700$
 $17 \times 1,000 = 17 \times 10 \times 10 \times 10 = 17,000$

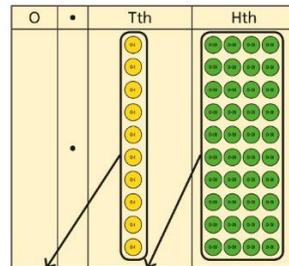

Scaffolding

Understand the effect of repeated multiplication by 10.

Use place value equipment to explore and understand the exchange of 10 tenths, 10 hundredths or 10 thousandths.

Represent multiplication by 10 as exchange on a place value grid.

$0.14 \times 10 = 1.4$

Understand how this exchange is represented on a place value chart.

$2.5 \times 10 = 25$
 $2.5 \times 100 = 250$
 $2.5 \times 1,000 = 2,500$

Th	H	T	O	.	Tth
			2	.	5
		2	5	.	
	2	5	0	.	
2	5	0	0	.	

Multiplying by multiples of 10, 100 and 1,000

Use known facts to multiply.

$5 \times 4 = 20$
 $5 \times 40 = 200$
 $5 \times 400 = 2,000$
 $5 \times 4,000 = 20,000$

$$5,000 \times 4 = 20,000$$

Scaffolding

Use place value equipment to represent how to multiply by multiples of 10, 100 and 1,000.

$4 \times 3 = 12$ $6 \times 4 = 24$
 $4 \times 300 = 1,200$ $6 \times 400 = 2,400$

Multiplying up to 4-digit numbers by a single digit

Use a column multiplication, including any required exchanges.

$$\begin{array}{r} 136 \\ \times \quad 6 \\ \hline 816 \\ \underline{23} \end{array}$$

Scaffolding

Explore how to use partitioning to multiply efficiently.

$$8 \times 17 = ?$$

$$8 \times 10 = 80$$

$$8 \times 7 = 56$$

$$80 + 56 = 136$$

So, $8 \times 17 = 136$

Represent multiplications using place value equipment and add the 1s, then 10s, then 100s, then 1,000s.

H	T	O
100	10 10 10 10 10 10	1 1 1
100	10 10 10 10 10 10	1 1 1
100	10 10 10 10 10 10	1 1 1
100	10 10 10 10 10 10	1 1 1
100	10 10 10 10 10 10	1 1 1

GRID METHOD?

Multiplying 2-digit numbers

Use column multiplication, ensuring understanding of place value at each stage.

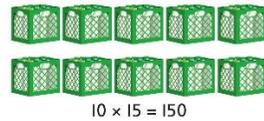

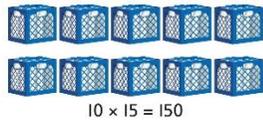

by 2-digit numbers

$$\begin{array}{r} 34 \\ \times 27 \\ \hline 238 \quad 34 \times 7 \\ \hline 680 \quad 34 \times 20 \\ \hline 918 \end{array}$$

Scaffolding

Partition one number into 10s and 1s, then add the parts.

$23 \times 15 = ?$

$3 \times 15 = 45$

There are 345 bottles of milk in total.

$$\begin{array}{r} \text{H T O} \\ 150 \\ + 150 \\ \hline 345 \end{array}$$

$23 \times 15 = 345$

	24 x 15	
X	10	5
20	200	100
4	40	20

Multiplying up to 4-digits by 2-digits

Use column multiplication, ensuring understanding of place value at each stage.

$$\begin{array}{r}
 143 \\
 \times 12 \\
 \hline
 286 \quad 143 \times 2 \\
 1430 \quad 143 \times 10 \\
 \hline
 1716 \quad 143 \times 12 \\
 \hline
 \end{array}$$

Progress to include examples that require multiple exchanges as understanding, confidence and fluency build.

$$1,274 \times 32 = ?$$

First multiply 1,274 by 2.

$$\begin{array}{r}
 1274 \\
 \times 32 \\
 \hline
 2548 \quad 1,274 \times 2 \\
 \hline
 \end{array}$$

Then multiply 1,274 by 30.

$$\begin{array}{r}
 1274 \\
 \times 32 \\
 \hline
 2548 \quad 1,274 \times 2 \\
 38220 \quad 1,274 \times 30 \\
 \hline
 \end{array}$$

Finally, find the total.

$$\begin{array}{r}
 1274 \\
 \times 32 \\
 \hline
 2548 \quad 1,274 \times 2 \\
 38220 \quad 1,274 \times 30 \\
 \hline
 40768 \quad 1,274 \times 32 \\
 \hline
 \end{array}$$

$$1,274 \times 32 = 40,768$$

Scaffolding

Use the grid method then add the parts.

	100	40	3
10			
2			

$$143 \times 12 = 1,716$$

There are 1,716 boxes of cereal in total.

$$143 \times 12 = 1,716$$

Division

Understanding inverse operations and the link with multiplication, grouping and sharing

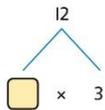

Represent the different multiplicative relationships to solve problems requiring inverse operations.

$$12 \div 3 = \square$$

$$12 \div \square = 3$$

$$\square \times 3 = 12$$

$$\square \div 3 = 12$$

Understand missing number problems for division calculations and know how to solve them using inverse operations.

$$22 \div ? = 2$$

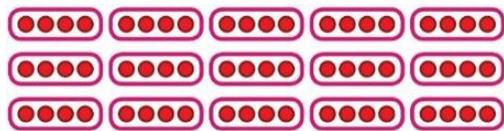

$$22 \div 2 = ?$$

$$? \div 2 = 22$$

$$? \div 22 = 2$$

Scaffolding

Represent multiplicative relationships and explore the families of division facts.

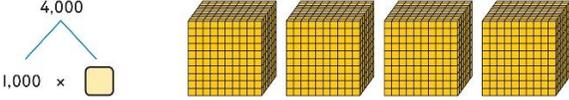

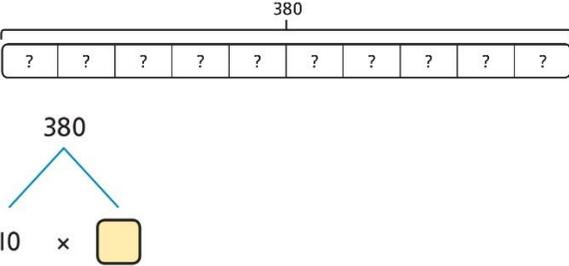

$$60 \div 4 = 15$$

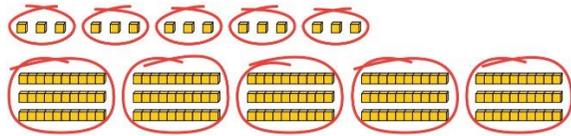

$$60 \div 15 = 4$$

Dividing whole numbers by 10, 100 and 1,000

Understand how and why the digits change on a place value grid when dividing by 10, 100 or 1,000.

Th	H	T	O
3	2	0	0

	<p>$3,200 \div 100 = ?$</p> <p><i>3,200 is 3 thousands and 2 hundreds.</i></p> <p>$200 \div 100 = 2$</p> <p>$3,000 \div 100 = 30$</p> <p>$3,200 \div 100 = 32$</p> <p><i>So, the digits will move two places to the right.</i></p>

<p>Scaffolding</p>	<p>Use place value equipment to represent known facts and unitising.</p>	<p>Represent related facts with place value equipment when dividing by unitising.</p>

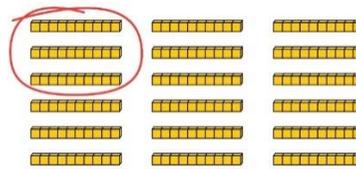

15 ones put into groups of 3 ones. There are 5 groups.

$$15 \div 3 = 5$$

15 tens put into groups of 3 tens. There are 5 groups.

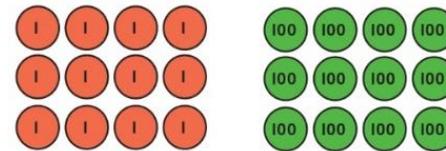

$$150 \div 30 = 5$$

180 is 18 tens.

18 tens divided into groups of 3 tens. There are 6 groups.

$$180 \div 30 = 6$$

12 ones divided into groups of 4. There are 3 groups.

12 hundreds divided into groups of 4 hundreds. There are 3 groups.

$$1200 \div 400 = 3$$

Dividing up to four digits by a single digit using short division

Use short division for up to 4-digit numbers divided by a single digit.

$$\begin{array}{r} 0 \ 5 \ 5 \ 6 \\ 7 \overline{) 3 \ 8 \ 9 \ 2} \end{array}$$

$$3,892 \div 7 = 556$$

Use multiplication to check.

$$556 \times 7 = ?$$

$$6 \times 7 = 42$$

$$50 \times 7 = 350$$

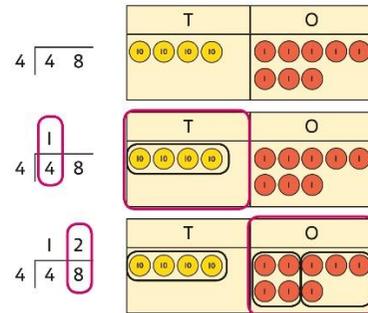

$$500 \times 7 = 3500$$

$$3,500 + 350 + 42 = 3,892$$

Scaffolding

Use place value equipment on a place value grid alongside short division.
The model uses grouping.

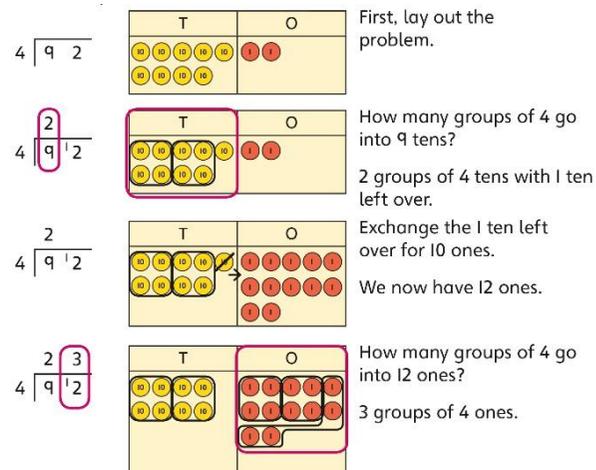

A sharing model can also be used, although the model would need adapting.

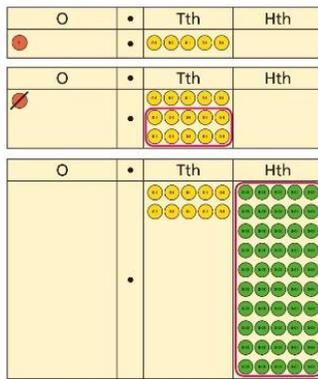

Lay out the problem as a short division.

There is 1 group of 4 in 4 tens.
There are 2 groups of 4 in 8 ones.

Work with divisions that require exchange.

<p>Understanding remainders</p>	<p>Use short division method above.</p>																															
<p>Scaffolding</p>	<p>Understand remainders using concrete versions of a problem.</p> <p>80 cakes divided into trays of 6.</p>  <p>80 cakes in total. 1.5 is 1 one and 5 tenths.
 This is equivalent to 10 tenths and 50 hundredths.
 10 tenths divided by 10 is 1 tenth.
 50 hundredths divided by 10 is 5 hundredths.
 1.5 divided by 10 is 1 tenth and 5 hundredths.
 $1.5 \div 10 = 0.15$

Year 6

Addition

Comparing and selecting efficient methods

Discuss similarities and differences between methods, and choose efficient methods based on the specific calculation.
 Compare written and mental methods alongside place value representations.

Use bar model and number line representations to model addition in problem-solving and measure contexts.

Use column addition where mental methods are not efficient. Recognise common errors with column addition.

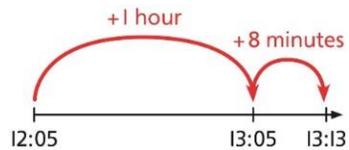

$$32,145 + 4,302 = ?$$

TTh	Th	H	T	O
3	2	1	4	5
+	4	3	0	2
3	6	4	4	7

TTh	Th	H	T	O
3	2	1	4	5
+	4	3	0	2
7	5	1	6	5

Which method has been completed accurately?

What mistake has been made?

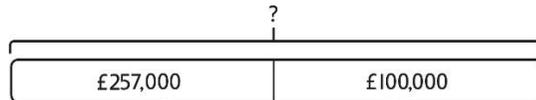

Column methods are also used for decimal additions where mental methods are not efficient.

H	T	O	·	Tth	Hth
1	4	0	·	0	9
+	4	9	·	8	9
1	8	9	·	9	8

Problem solving

Use a bar model to support thinking in addition problems.

$$257,000 + 99,000 = ?$$

I added 100 thousands then subtracted 1 thousand.

$$257 \text{ thousands} + 100 \text{ thousands} = 357 \text{ thousands}$$

$$257,000 + 100,000 = 357,000$$

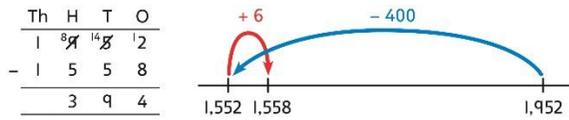

$$357,000 - 1,000 = 356,000$$

$$\text{So, } 257,000 + 99,000 = 356,000$$

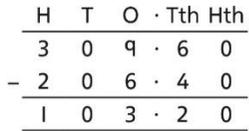

Subtraction

Comparing and selecting efficient methods

Compare and select methods.
Use column subtraction when mental methods are not efficient.
Use two different methods for one calculation as a checking strategy.

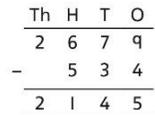

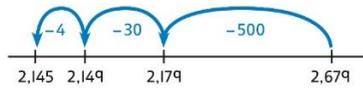

Use column subtraction for decimal problems, including in the context of measure.

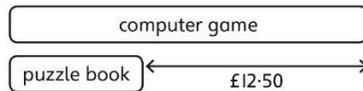

Scaffolding

Compare subtraction methods alongside place value representations.

Use a bar model to represent calculations, including 'find the difference' with two bars as comparison.

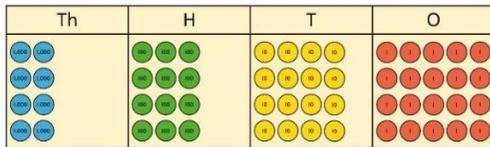

Multiplication

Multiplying up to a 4-digit number by a single digit number

$$\begin{array}{r}
 3225 \\
 \times \quad 4 \\
 \hline
 12900 \\
 \hline
 \end{array}$$

Scaffolding

Use equipment to explore multiplications.

4 groups of 2,345

This is a multiplication:

$$\begin{array}{l}
 4 \times 2,345 \\
 2,345 \times 4
 \end{array}$$

	3,000	200	20	5
4	12,000	800	80	20

$12,000 + 800 + 80 + 20 = 12,900$

Multiplying up to a 4-digit number by a 2-digit number

Use compact column multiplication

$$\begin{array}{r}
 1235 \\
 \times \quad 21 \\
 \hline
 1235 \\
 24700 \\
 \hline
 25935
 \end{array}$$

Scaffolding	<p>Method 1</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <tr> <td></td> <td style="text-align: center;">1,000</td> <td style="text-align: center;">200</td> <td style="text-align: center;">30</td> <td style="text-align: center;">5</td> </tr> <tr> <td style="text-align: right;">20</td> <td style="text-align: center;">20,000</td> <td style="text-align: center;">4,000</td> <td style="text-align: center;">600</td> <td style="text-align: center;">100</td> </tr> <tr> <td style="text-align: right;">1</td> <td style="text-align: center;">1,000</td> <td style="text-align: center;">200</td> <td style="text-align: center;">30</td> <td style="text-align: center;">5</td> </tr> </table>		1,000	200	30	5	20	20,000	4,000	600	100	1	1,000	200	30	5

Multiplying decimals	<p>Use known facts to multiply decimals.</p> $4 \times 3 = 12$ $4 \times 0.3 = 1.2$ $4 \times 0.03 = 0.12$ $20 \times 5 = 100$ $20 \times 0.5 = 10$ $20 \times 0.05 = 1$ <p>Find families of facts from a known multiplication.</p> <p><i>I know that $18 \times 4 = 72$.</i></p> <p><i>This can help me work out:</i></p> $1.8 \times 4 = ?$ $18 \times 0.4 = ?$ $180 \times 0.4 = ?$																										

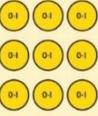

$$18 \times 0.04 = ?$$

Scaffolding

Represent calculations on a place value grid.

$$3 \times 3 = 9$$

$$3 \times 0.3 = 0.9$$

T	O	•	Tth
			

Use a place value grid to understand the effects of multiplying decimals.

	H	T	O	•	Tth	Hth
2×3			6	•		
0.2×3			0	•	6	
0.02×3				•		

Division

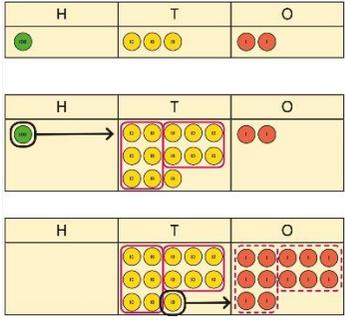

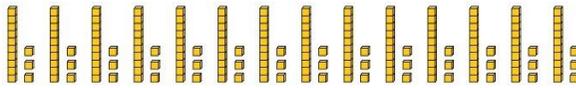

Dividing by a single digit

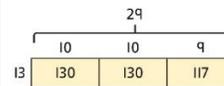

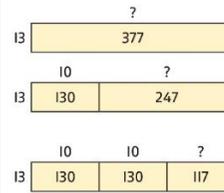

Use short division to divide by a single digit.

$$\begin{array}{r} 0 \\ 6 \overline{) 132} \end{array}$$

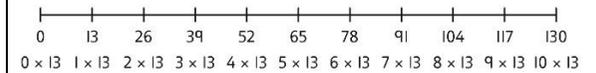

$$\begin{array}{r} 02 \\ 6 \overline{) 132} \end{array}$$

$$\begin{array}{r} 022 \\ 6 \overline{) 132} \end{array}$$

<p>Scaffolding</p>	 <p>How many groups of 6 are in 100?</p> $6 \overline{) 132}$ <p>How many groups of 6 are in 13 tens?</p> $6 \overline{) 132}$ <p>How many groups of 6 are in 12 ones?</p> $6 \overline{) 132}$		
<p>Dividing by a 2-digit number using factors</p>	<p>Use factors and repeated division where appropriate.</p> <p>$2,100 \div 12 = ?$</p> <p> $2,100 \rightarrow \boxed{\div 2} \rightarrow \boxed{\div 6} \rightarrow$ $2,100 \rightarrow \boxed{\div 6} \rightarrow \boxed{\div 2} \rightarrow$ $2,100 \rightarrow \boxed{\div 3} \rightarrow \boxed{\div 4} \rightarrow$ $2,100 \rightarrow \boxed{\div 4} \rightarrow \boxed{\div 3} \rightarrow$ $2,100 \rightarrow \boxed{\div 3} \rightarrow \boxed{\div 2} \rightarrow \boxed{\div 2} \rightarrow$ </p>		
<p>Scaffolding</p>	<p>Use factors and repeated division.</p> <p>$1,260 \div 14 = ?$</p>  <p>$1,260 \div 2 = 630$</p> <p>$630 \div 7 = 90$</p> <p>$1,260 \div 14 = 90$</p>		
<p>Dividing by a 2-digit number using long division</p>	<p>Use equipment to build numbers from groups.</p>  <p><i>182 divided into groups of 13. There are 14 groups.</i></p>	<p>Use an area model alongside written division to model the process.</p> <p>$377 \div 13 = ?$</p>	<p>Use long division where factors are not useful (for example, when dividing by a 2-digit prime number). Write the required multiples to support the division process.</p> <p>$377 \div 13 = ?$</p>

$$377 \div 13 = 29$$

$$\begin{array}{r}
 13 \overline{) 377} \\
 - 130 \quad 10 \\
 \hline
 247 \\
 - 130 \quad 10 \\
 \hline
 117 \\
 - 117 \quad 9 \\
 \hline
 0 \quad 29
 \end{array}$$

$$377 \div 13 = 29$$

A slightly different layout may be used, with the division completed above rather than at the side.

$$\begin{array}{r}
 3 \\
 21 \overline{) 798} \\
 - 630 \\
 \hline
 168
 \end{array}$$

$$\begin{array}{r}
 38 \\
 21 \overline{) 798} \\
 - 630 \\
 \hline
 168 \\
 - 168 \\
 \hline
 0
 \end{array}$$

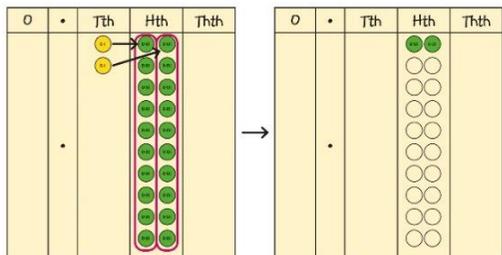

Divisions with a remainder explored in problem-solving contexts.

Dividing by 10, 100 and 1,000

Use place value equipment to explore division as exchange.

Represent division to show the relationship with multiplication. Understand the effect of dividing by 10, 100 and 1,000 on the digits on a place value grid.

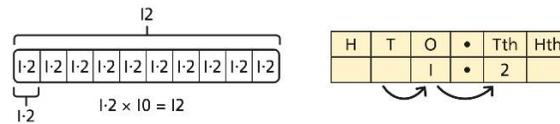

Use knowledge of factors to divide by multiples of 10, 100 and 1,000.

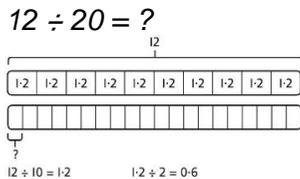

Exchange each 0.1 for ten 0.01s.

Divide 20 counters by 10.

0.2 is 2 tenths.
 2 tenths is equivalent to 20 hundredths.
 20 hundredths divided by 10 is 2 hundredths.

Understand how to divide using division by 10, 100 and 1,000.

$12 \div 20 = ?$

$12 \div 10 = 1.2$ $1.2 \div 2 = 0.6$

$40 \div 50 = \square$

$40 \rightarrow \boxed{\div 10} \rightarrow \boxed{\div 5} \rightarrow ?$

$40 \rightarrow \boxed{\div 5} \rightarrow \boxed{\div 10} \rightarrow ?$

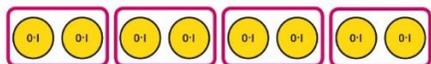

$40 \div 5 = 8$

$8 \div 10 = 0.8$

So, $40 \div 50 = 0.8$

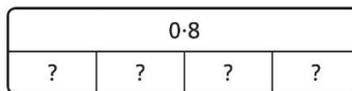

Dividing decimals

Use place value equipment to explore division of decimals.

8 tenths divided into 4 groups. 2 tenths in each group.

Use a bar model to represent divisions.

$4 \times 2 = 8$

$8 \div 4 = 2$

So, $4 \times 0.2 = 0.8$

$0.8 \div 4 = 0.2$

Use short division to divide decimals with up to 2 decimal places.

$8 \overline{) 4.24}$

0.

$8 \overline{) 4.24}$

0.5

$8 \overline{) 4.24} \begin{array}{l} 24 \\ \underline{40} \end{array}$

0.53

$8 \overline{) 4.24} \begin{array}{l} 24 \\ \underline{40} \\ 24 \\ \underline{24} \end{array}$
